

SoftOne initiates a collaboration with TimeTerminal

SoftOne Group, the developer and supplier of the cloud-based business system SoftOne GO, has broadened its range of designated suppliers of time terminals to offer its customers increased security and choice. The time terminals are used by SoftOne's customers who use the SoftOne TimeStamp software for time stamping.

- Our collaboration with TimeTerminal is a step in our work to offer our customers a high level of service. TimeTerminal meets our supplier requirements which aim to ensure that our customers have access to a quality-assured terminal tailored to their needs. The time terminal is an important working tool for our customers. TimeTerminal also offers our customers two years of supplementary support and guarantee as part of their offering, which is a security for us and our customers, says Denho Bilir, Chief Information Officer at SoftOne Group.

- We at TimeTerminal are very pleased with the collaboration with SoftOne Group. SoftOne has a large number of customers in many industries, and especially in the retail and grocery trade where time terminals are often used. Our touch screen terminals are optimized for cloud services and we look forward to supporting SoftOne's customers, says Dirk Lüders, Global Partnerships Director at TimeTerminal.

In SoftOne Timestamp, employees have the opportunity to stamp their times and indicate deviations if needed. In addition to stamping, employees can also view their schedule, balances, remaining breaks and news that you want to share via the stamp clock UI. You can also print a fire list from the terminal. Users can choose any hardware for SoftOne TimeStamp, but a quality assured solution is recommended as the on-screen load can be high.

SoftOne's designated suppliers of time terminals can be found [here](#).

About SoftOne Group

SoftOne Group is a Nordic company that offers the cloud service SoftOne GO Business and HR System to small and medium-sized companies in the Nordic region. Customers include ICA, Elkedjan, Mathem, the Tele2 stores, Instalco and several others in the retail trade, service and craft companies and accounting firms. SoftOne GO Cloud Services covers both sales and finance modules as well as project accounting, logistics, HR and payroll and is the leading total solution as a cloud service for small and medium-sized companies in the Nordic market.

About TimeTerminal

Since 1999, [TimeTerminal Sweden](#) has designed, designed and manufactured world-class terminals that are specifically used with advanced cloud-based web apps for Workforce Management, Time and Attendance & Payroll. Our innovative ideas led to the early use of Touch Screen technology for improved use of these applications.

Every day, our terminals are used by government agencies and companies in retail, manufacturing, healthcare, hotels & tourism and logistics. Our mission is clear - to make WFM web applications work and perform in a fantastic way.
