

Technical requirements

Last updated 2022-10-07

For SoftOne GO to work optimally and for you to have the best possible experience, your computer and phone should meet our system requirements. Please note that the system is operated by SoftOne so the requirements only apply to your work computers and mobile phones. Own servers are not needed because SoftOne is a cloud-based service. Even if your hardware doesn't meet the requirements, the system can function, but the experience may be affected.

System requirements for SoftOne® GO

Web browser

Recommended: Latest version of Chrome, Firefox, Edge or Safari

Processor (CPU)

Recommended: Equivalent to Intel Core i7 or better

Minimum requirements: Equivalent to Intel Core i3

(For minimum requirements, age limit does not exceed 2 years)

Internal memory (RAM)

Recommended: 8 GB*

Minimum requirements: 4 GB

(Above only applies to SoftOne GO. Consider system requirements for other applications.)
