1. Schedule/TimeScheduleInfo

API Endpoint: Schedule/TimeScheduleInfo

Get schedule info

1.1 Summary

This API endpoint, **TimeScheduleInfo**, is used to retrieve work schedule information for employees in SoftOne GO. The endpoint provides time-based schedule blocks, payroll information and associated account and product data.

It supports filtering by date range and specific employees.

2. Request

This section outlines the structure, parameters, and required data used when making a request to this endpoint.

2.1 Overview

- Method: GET
- URL:

<https://apiexternal.softone.se/Personell/Schedule/TimeScheduleInfo>

2.2 Authentication

This endpoint requires **token-based authentication** using a combination of API keys and an access token. where:

- API keys identify the company and integration
- A time-limited access token authorizes access to protected resources

All three parameters are required for successful authentication.

The access token is obtained by calling the **/Login/Token** endpoint and must be included in every authenticated request.

2.3 Parameters

| Name | Type | Required | Description |
|-------------------|-----------|----------|---|
| companyApiKey | string | Yes | Identifies the company whose data is being accessed |
| connectApiKey | string | Yes | Identifies the integration partner / connecting application |
| Token | string | Yes | Access token used to authenticate the request |
| dateFrom | date-time | Yes | Start date of the schedule period to retrieve |
| dateTo | date-time | Yes | End date of the schedule period to retrieve |
| employeeNrsString | string | Yes | Comma-separated list of employee numbers to include. An empty or null value will return information for all employees. |
| addAmounts | boolean | No | <p>Include transaction amounts (financial data) in the response.</p> <p>Used for retrieving what a shift is planned to cost compared to actual cost - please consider removing that if not being used.</p> <p>(default: true)</p> <p>Note: consider setting this to false if not needed due to performance cost.</p> |
| loadSchedule | boolean | No | Include schedule information in the response (default: true) |
| loadPayroll | boolean | No | <p>Include payroll information in the response.</p> <p>Used for obtaining actual outcomes of the shifts, who was sick, who showed up late e.tc.</p> <p>(default: true)</p> <p>Note: this parameter is resource heavy.</p> |

3. Response

The response returns schedule information, payroll entries, account metadata and time structure for each employee included in the request. Here's a breakdown of all fields returned.

3.1 Fields

| Name | Type | Description |
|-----------------------|----------|---|
| StartDate | datetime | Start of the selected schedule interval |
| StopDate | datetime | End of the selected schedule interval |
| Accounts | array | List of accounts used in scheduling and payroll |
| TimeScheduleEmployees | array | List of employees with schedule, payroll, and calendar info |
| ProductInfos | array | Product metadata used in payroll information |
| ShiftTypeInfoos | array | Shift type metadata |
| AttestStateInfos | array | Attestation states for payroll data |

GET

```
{{baseUrl}}/Personell/Schedule/TimeScheduleInfo?companyApiKey={{CompanyApiKey}}&&connectApiKey={{ConnectApiKey}}&token={{token}}&dateFrom=2026-05-07&dateTo=2026-05-07&employeeNrsString=104&addAmounts=false&loadSchedule=false&loadPayroll=true
```

The endpoint returns **all payroll rows**, not only ordinary worked hours.

To retrieve actual worked hours, the integration must apply filtering based on the customer's payroll configuration.

In most cases, worked hours are identified by one or more payroll products such as:

- Timlön (hourly wage)
- Månadslön (monthly salary)
- Other customer-specific payroll products

Because payroll configurations differ between customers, the integration must determine which payroll products represent worked time.

5. SoftOne GO UI Mapping

This section explains how the API data relates to the UI/logic in SoftOne GO. It also describes the purpose of the properties in context of SoftOne GO. It helps new integrators connect what they see in the system with what they get via the API.

Navigate to <https://go.softone.se>

Select Staff->Time->Attest Time

From here you will be able to view a person

The screenshot displays the 'Attest Time' interface in SoftOne GO. The top navigation bar shows 'Staff' and 'All your accounts'. The left sidebar contains navigation options: Favorites, Dashboard, Employee, Planning, Time, Attest Time, Calendar, My Time, Payslips, Routines, Salary, Import, Export, Reports, and Settings. The main content area is titled 'Attest Time' and shows details for employee 104 Robin Ludvigsdahl. The employee's employment position is 'Permanent Position', start date is '2022-04-01', and employment rate is '88.89%'. The interface includes a calendar for May 2026 and a detailed attendance table. The table has columns for Date, Weekday, Week, Attestation Level, Start, End, Time, Break, and Approved. A summary bar indicates 5/726 hours worked, with 56.45 hours in red (indicating warnings) and 13.00 hours in green. Below the table, there is a section for Salary ID and Attestation Level with columns for Start, End, Quantity, Coding, Children, and Comment.
